

The choice is yours.....

Why choose Camden Windows.....

Acting on consumer demand for superior quality, high performance and thermally efficient products which are manufactured in a sustainable fashion, Camden Group has developed a comprehensive range of products under the Camden Window brand.

All products in the range have been designed to deliver the highest levels of energy efficiency while retaining maximum weather and security performance. The range spans all of Camden's product lines including: frames, insulated sealed units, fully glazed windows and the **Camden eCare Energy Rated range of fully glazed windows which are available with a BFRC approved A to C rating**, ensuring that there is a window to suit everyone's needs. When you buy a Camden product you can be assured of quality, performance and sustainability.

Camden use only tough, durable PVCu materials in the fabrication of the window frames, which offer many advantages over wood. The durability of PVCu ensures it does not rot or warp. In addition it can be energy efficient, offering significant energy and cost savings depending on spacer bar and glass type specified; benefiting both the environment and homeowner. **Camden Group use Warm Edge Super Spacer as standard in all sealed units.**

PVCu doesn't just mean white: the Camden range can be coloured in traditional rich mahogany, golden oak and new to the range, natural and walnut, in addition to a choice of contemporary colours with a woodgrain effect. Now there is the option of choosing clean white lines or wood effect on the inside, and the wood effect on the outside.

When investing in replacement or new build windows not only can they enhance the appearance of a home, reduce heating bills and improve security, they are an essential lifestyle purchase.

In response Camden Group have developed a vast range of window styles, finishes and decorative glass, specifically designed to suit every house type, from a traditional Victorian town house to a contemporary loft conversion. All frames are manufactured from high impact PVCu, supplied either fully reinforced (coloured frames) or partially reinforced (white frames) with welded corners, and are more secure than ever with multipoint locking systems.

EVERY HOME IS DIFFERENT THAT'S WHY CAMDEN GROUP MANUFACTURE WINDOWS TO THE EXACT SHAPE, SIZE, STYLE, AND GLAZING DESIGN SPECIFIED.

Consider the added benefits that can be made to any home before you make your final choice :

- Increased Home Security
- Increased Energy Efficiency
- Reduced Noise
- Low Maintenance

the only limit is your imagination!

Casement Windows

Casement windows are the most popular style of window due to their versatility and are ideal for any direct window replacement.

The range includes fixed light, side-hung and top-hung sashes, and bay windows. These can be combined in an extensive series of configurations with or without opening sashes, and are suitable for low or medium rise dwellings.

Special Windows

Camden Specials make a unique addition to your home. Camden's investment in top of the range machinery ensures that frames can be manufactured in practically any shape.

Choose from:

- Porthole windows
- Apex windows
- Angled windows with opening sashes
- Arched windows with opening arched sashes
- Gothic Arches
- Arched Tilt 'n' Turns
- Vertical Sliders with an Arched Head

Camden 60S

The 60S sculptured frame fits naturally into its surroundings, complementing any building without compromising on style. The 60S frame has been specifically fabricated for the Camden Group and is only available to Camden customers. Its stylish, striking looks are designed to enhance the home of image conscious property owners.

- Matching External Sills
- Tilt 'n' Turn Energy Rated Windows Available
- Available in a BFRC approved A rated window

Vertical Sliding Sash Windows

The sliding sash window range combines the elegance of traditional sash windows with the benefits of modern materials. Manufactured from PVCu they are strong, will not rot, warp or require repainting; ensuring that they retain their colour and shape throughout the years with the minimum of maintenance.

Suitable for replacing existing timber sliders in period buildings, whilst still appealing to new builds seeking to capture a traditional feel. The traditional style can be enhanced with the addition of georgian or astrical bars, alternatively decorative horns can be added.

All options are available in white, oak, cream and new to the range black*.

Vertical Sliding Sash windows are available in C energy rating.

Tilt 'n' Turn and French Windows

French Windows

Brighten up your home and improve the view with the option of french windows. The opening allows unrestricted access, is an ideal fire escape route and provides maximum ventilation.

Tilt 'n' Turns

The Tilt 'n' Turn window is a versatile system, ideal for many different types of installation from high rise blocks to domestic houses. It is secure, easy to operate and looks stunning with any house style. The tilt position makes it convenient for ventilation, and also features a side hung facility for opening into the room. Tilt 'n' Turn windows are also very easy to clean from the inside of the room and are an ideal fire escape exit due to the opening at the 90 degree angle. Camden Tilt 'n' Turns are fitted with the unique, user friendly and secure 'Easi-Gear' (Efficiency and Security Innovation Gear) hinge system.

Camden Colour and Glass Choice....
